WHITEPAPER

Release notes & Changelog

Legal notice

This Whitepaper is used only to provide general information regarding the PLUS MINUS GAME project. The information contained in the Whitepaper is current as of the date indicated on the cover. The content of this Whitepaper is being written continuously and can be revised after review. We reserve the right to update this Whitepaper at any time. The goals set out in this Whitepaper may not necessarily be achieved or completed as intended. Any plans, goals outlined in this paper for the PLUS MINUS GAME project should not be considered as absolute facts.

WHITEPAPER

Release notes & Changelog

Legal notice

Participation in the token sale may entail high speculation, and in this regard, there is also a risk of complete loss of principal. Prospective buyers should thoroughly review the PMG token sale terms and conditions and carefully consider all risks associated with them. This Whitepaper by itself does not guarantee security. In many regions, token sales are subject to scrutiny, and regulations are not fully enacted. In addition, some organizations consider that the token sale itself may meet the requirements of an investment sale contract.

WHITEPAPER

Release notes & Changelog

Legal notice

This Whitepaper by itself does not guarantee security. In many regions, token sales are subject to scrutiny, and regulations are not fully enacted. In addition, some organizations consider that the token sale itself may meet the requirements of an investment sale contract. This Whitepaper does not recommend trading PMG tokens in any way. As regulations related to cryptocurrencies are constantly changing, participation in the purchase of PMG tokens may involve significant risks, and prospective purchasers should consult with legal and tax experts in advance and carefully.

WHITEPAPER

Release notes & Changelog

Legal notice

Users acknowledge that the PLUS MINUS GAME project is under development, it may entail significant changes before its official announcement, and it does not guarantee the operating period of the PLUS MINUS GAME ecosystem. The game may cease to exist due to various reasons, such as lack of public interest, lack of operating funds, and other force majeure situations that may occur in business.

WHITEPAPER

Release notes & Changelog

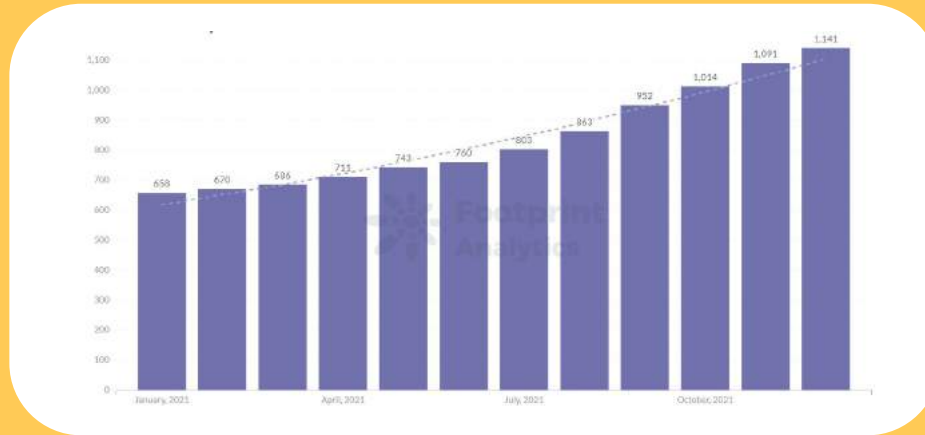

Legal notice

Other than the official channels and documents mentioned in this Whitepaper, PLUS MINUS GAME never ask for confidential information from users, make arbitrary conditions or proposals, either publish or distribute responsible articles, information, content anywhere else in any way. Therefore, to minimize the possibility of fraud, phishing by third parties, users are advised not to respond to those unofficial inquiries and announcements. Any problems arising from the response are irrelevant to the PLUS MINUS GAME and the company.

MARKET ANALYSIS

In the first half of 2021, the idea of GameFi really took shape, defined as a combination of gaming + DeFi + NFT. Axie Infinity is the first game to demonstrate how a combination of DeFi and NFT can work for the field.

In the second half of 2021, GameFi overtook DeFi to become the hottest sector in the crypto market. With Facebook changing its name to Meta, the metaverse became a widely known term. GameFi related transactions have grown by 2,934% this year.

MARKET ANALYSIS

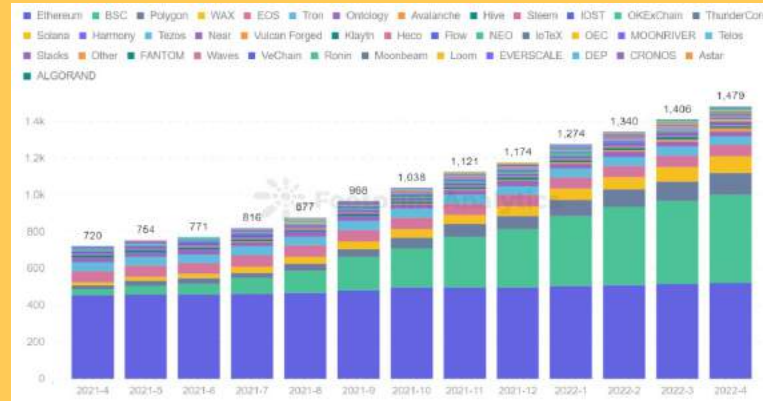

GameFi started its explosive growth phase in March, which will run until August 2021. GameFi transactions also experienced two growth peaks during this period, on April 9 and December 27.

MARKET ANALYSIS

GameFi Growth Focuses on Binance Smart Chain and Polygon

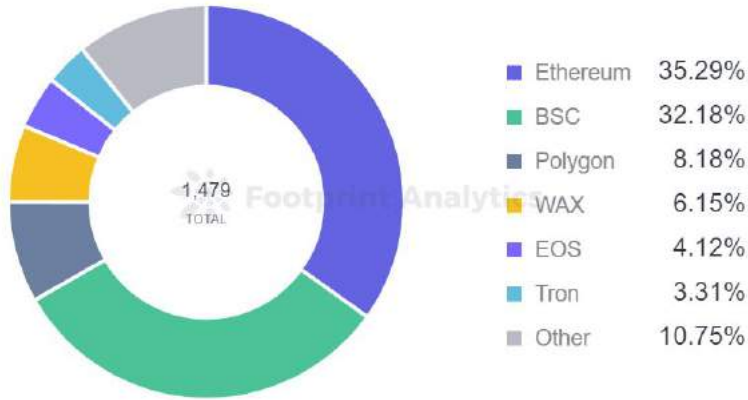

According to Footprint Analytics - a data discovery platform on GameFi, NFT, Metaverse, DeFi, as of April 30, 2022, the GameFi field was present on 38 blockchain platforms, with 1,479 game projects, recording an increase was 5.2% month-on-month.

Although the GameFi ecosystem in the Ethereum blockchain holds a significant share of the entire market, it is not as fast as Binance Smart Chain (BSC) and Polygon in terms of growth.

MARKET ANALYSIS

Games on BSC and Polygon have become more popular in today's crypto market. This can be explained by the advantages that these two blockchain platforms bring to users and developers. Mainly low transaction fees, no network congestion, and high security, providing users with a more seamless experience.

MARKET ANALYSIS

GameFi's active users and transaction volume decreased significantly compared to March 2022

As of April 30, 2022, the total number of active users is 9.22 million, of which the number of new users is 780,000. When compared to March 2022, the number of active users recorded a decrease of 24.9%.

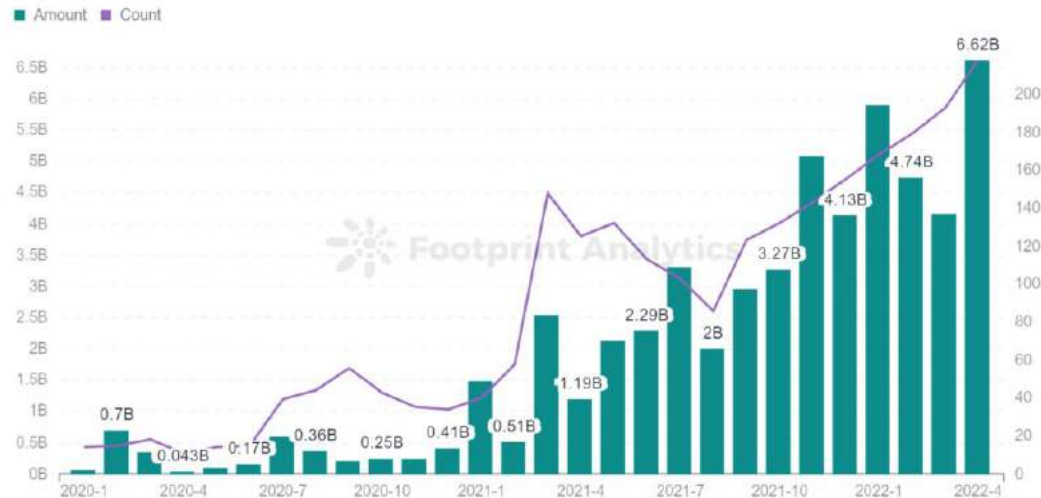

In fact, since October 2021, although the number of new games has increased, the number of new and active users has decreased significantly.

MARKET ANALYSIS

GameFi raised more capital than March 2022

On-chain data notes that the amount of funding in the blockchain sector in April 2022 reached an impressive figure of 6.62 billion USD. In which, the GameFi sector accounted for 36.3%, with 2.4 billion USD, up 381% compared to March 2022.

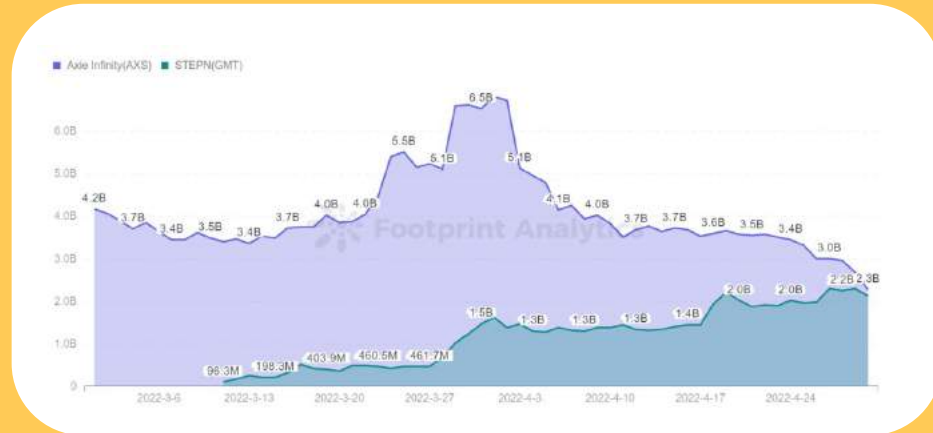

MARKET ANALYSIS

STEPN becomes the most interested application in the field of GameFi

STEPN is a blockchain application that allows users to earn money through moving, this model is called “Move to Earn”. This is the project that has achieved the most success in this new trend and has the potential to help GameFi become the mainstream in the near future.

Users buy NFT sneakers and pay with the game's GMT tokens, use them to move around and earn.

Even though STEPN is incredibly young, its market capitalization has already surpassed \$2 billion. In the future, STEPN could surpass Axie Infinity's market cap of \$2.2 billion.

MARKET ANALYSIS

Footprint Analytics data shows that the price of the GMT token has increased from \$0.16 to \$3.52, a 2.100% increase in a short period of time.

MARKET ANALYSIS

SUMMARY

Although, GameFi cannot avoid the influence of factors coming from the macro economy, causing the transaction volume and the number of users to decrease. However, individual blockchain projects also saw positive news in April.

The GameFi market cooled down in the first half of this year, but GameFi continues to grow. Specially, the PMG project that we continue to develop new and attractive features with the goal of giving users the best experience.

GAME INTRODUCTION

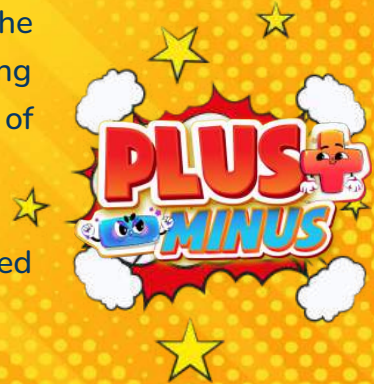

PLUS MINUS GAME from simple childhood math problems, this game has been converted into an online version with rich game modes providing the best experience for players.

PLUS MINUS GAME is an extremely simple online competitive game that offers the ultimate fun and satisfaction to players who want to be rewarded with in-game merchandise. Our goal with PLUS MINUS GAME is to bring satisfaction and happiness rewards to players.

A super simple P2E (play to earn) game that you can't find anywhere else in the world. Do you remember? When we were in school, the stationery stores, in front of the supermarket and the games about memories in the game room.. it made us stop. Among them, you will remember the game 'Addition and subtraction' among the legendary games of children that make us cry and laugh.

At that time, the game "Additional & Subtraction" was reborn as an online P2E game called **PLUS MINUS GAME**.

We want to introduce it and write legendary history once more to you in 2022.

GAME INTRODUCTION

PLUS MINUS GAME is a free online game with no time and place limit, anyone can play the game quickly and easily online.

You can play freely and get real-time based bonuses and based on selected outcome of plus and minus value.

One of the most popular money-making games right now is 'Axie Infinity' P2E Game, although it can't be compared, **PLUS MINUS GAME** is a game with a fair winning system that doesn't need operations, buttons simple to play, quick to confirm results and a reward system that boasts an extremely simple gameplay that offers the most fun and satisfaction to players who have a desire for parts Rewards with valuable goods when playing the game.

PMG HISTORY

An arcade video game takes player input from its controls, processes it through electrical or computerized components, and displays output to an electronic monitor or similar display. Most arcade video games are coin-operated, housed in an arcade cabinet, and located in amusement arcades alongside other kinds of arcade games. Until the late 1990s, arcade video games were the largest and most technologically advanced segment of the video game industry.

PMG HISTORY

Early prototypical entries Galaxy Game and Computer Space in 1971 established the principle operations for arcade games, and Atari's Pong in 1972 is recognized as the first successful commercial arcade video game. Improvements in computer technology and gameplay design led to a golden age of arcade video games, the exact dates of which are debated but range from the late 1970s to mid-1980s. The arcade industry had a resurgence from the early 1990s to mid-2000s, but ultimately declined in the Western world as competing home video game consoles such as the Sony PlayStation and Microsoft Xbox increased in their graphics and gameplay capability and decreased in cost. Nevertheless, Japan, China, and Korea retain a strong arcade industry in the present day.

VISION

PLUS MINUS GAME is a game inspired by childhood games, when children begin to understand numbers and math problems for the first time in life. The game has a simple but meaningful message, and also offers the opportunity to "play to earn" for players in a busy work life.

We are really excited to create a new game that brings satisfaction and joy to people around the world. We believe that today's online games have a certain influence on our lives and an individual or a group whose life is impossible or struggling can uncover the hidden things of society, other associations through the user's imagination, rapid selection and control, in addition between human interaction and creative activities in the game.

VISION

Blockchain technology is a technology that can greatly contribute in taking the gaming sector to the next level. Decentralization, security, transparency, trust and scalability and the outstanding source of blockchain guaranteeing freedom can help you do things that are not possible in traditional games. In keeping with this unchanging trend and the needs of the times, we have prepared this game with a service policy and system that makes players feel happy and satisfied not only in the game but also in practice. In particular, it can help a lot economically and can be another incentive for users to live.

VISION

With a reimagined childhood slot machine motif, providing users with the best excitement, nostalgia and rewards to immerse themselves in our **NFT game** with bonus policy and easier access. We constantly update the version with the sustainable development of the game and through that, anyone can comfortably play the game easily, get rewards and create an NFT ecosystem through NFT interaction according to the user's effort, ability, and free will. We are all walking and growing together.

VISION

■ From Short-forms to Short-games

Short-forms are videos with short content and 1 to 10 minutes in size with many genres. These short pieces are characterized by directly showing stories in a short period of time to avoid viewers dropping off mid-view because of too much information.

From the above idea, we created short-game so that players can transform short boring moments into uplifting moments, not only that, but also earn money.

MISSION

- ★ **PLUS MINUS GAME**'s mission is to overcome the complex NFT game environment to build an optimal gaming environment for quick access, high performance and user convenience. In addition, anyone should be able to smoothly create, buy, sell, exchange, farm and utilize.
- ★ To provide equipment for anyone to quickly deal with cryptocurrency without expertise in NFT through simple game activities.
- ★ From the user's point of view, the overall background of the game and the design of each element should be unique and attractive, and the diversity of game modes and fair rewards must be accompanied to ensure sustainable play.
- ★ This is one of the important factors that keep players interested and fun to access and engage with the game every day.
- ★ When the game is played, the result of the game must be correctly reflected according to the level, characteristics, skills, and user control of the NFT character or item held by the user. In particular, data on all rewards provided to players as a result of the game must be transparently managed and maintained by blockchain technology.

MISSION

In the era of ever-evolving, powerful phones were born to accommodate the growth of increasingly complex and storage-intensive games.

However, in countries with low development such as Timor-Leste, Liberia, South Sudan, Somalia Old phones are no longer applicable to play games.

We make PLUS MINUS GAMES so that players who have easy access to any outdated phone or computer can use it easily.

GAME PROCESS

GAMEPLAY

BASIC STEPS TO PLAY

- When you click on the place to insert coin, 1 coin will be inserted to join the game
- The first spin spins a random number from 0 to 10.
- The second spin spins randomly with a plus or minus sign.
- The third spin spins a random number from 0 to 10.
- Get the result.

Game Platform

- Version : Mobile game

Game Genre:

- Funny game
- Arcade video game
- Play to Earn game

Game Type

- 'Play-To-Earn' blockchain based online game.

Example:

- The first spin results in 5.
- The 2nd spins result in plus.
- The 3rd spin results in 4.
- The result is $5+4=9$.

GAMEPLAY

■ Game Modes

PvE Mode

Players versus Environment (PvE) games are those in which players play entirely against the game's AI.

Each time you join a match, player can earn additional coin based on the result value.

Example:

- Result value '5' = earn 5 PMG coins
- Result value '0' = lost 1 PMG coin
- Result value '-5' = lost 1 PMG coin

PvP Mode

Players versus players (PvP) are game those in which players play entirely against other players. Players have to choose betting coin level before starting. Each time you join a match, players can earn based on the coin they bet.

Example:

2 players choose betting level 100 coins

- Your result is 9 and enemy's result is 3 = you win 100 coins and the enemy lose 100 coins

GAMEPLAY

■ Game Modes

Tournament Mode

- There are 8 players joining in a tournament
- There are 3 betting level of coins to choose
- Tournament will be divided into 4 pairs
- 2 last winners will be moved to the final round
- The final round will have 3 battle rounds
- The player wins 2 rounds in a row will get the 1st prize, the rest gets 2nd prize (no need 3rd round)
- If 2 players have alternate results, they have to join 3rd round. The player has more than winning rounds will get the 1st prize, the rest gets the 2nd prize
- The 1st winner and 2nd winner have to pay 5% fee deduction of total their reward value
- The 1st winner and 2nd winner will get rewards correlated with every betting level

GAMEPLAY

■ Policy

TOKENOMICS

Token DOZEN (PMG)

- ★ The PMG project is an NFT crafting game that runs on Binance Smart Chain (BSC). It is built app-based and users need to download apps on the official Plus Minus Game website, Apple Store or Google Play. Players employ predictability to defeat opponents and collect in game tokens, which can be used to buy items and increase the earn rate.
- ★ Blockchain network: BEP-20
- ★ Coin name: DOZEN

TOKENOMICS

❑ PLAY TO EARN

- ★ Play to Earn (P2E) is a form of helping players receive a certain benefit or reward when participating in the game. In short, playing games to make money. Currently, Play to Earn is an extremely hot topic in recent times, starting with the explosion of a game from Vietnam - Axie Infinity.
- ★ Besides, NFT is also a trend that is attracting the attention of users, and this is also the technology applied in Axie Infinity, with this combination making the game "hot" than ever.

TOKENOMICS

❑ PLAY TO EARN

- ★ PLUS MINUS GAMES utilizes a Play-to-Earn model by distributing \$DOZEN through mining and game activities, giving value to players NFT's by increasing their use through future features. NFT's may be freely traded on the marketplace for \$DOZEN tokens, which can then be traded on exchanges or converted to fiat currency.
- ★ Currently, the following options are available for the player to earn:
 - ❖ Use PMG' NFT to increase win rate and play to earn more \$DOZEN
 - ❖ \$DOZEN is used for PLUS MINUS GAME x NFT MARBLE GAME that promote the economic activities of 2 games.

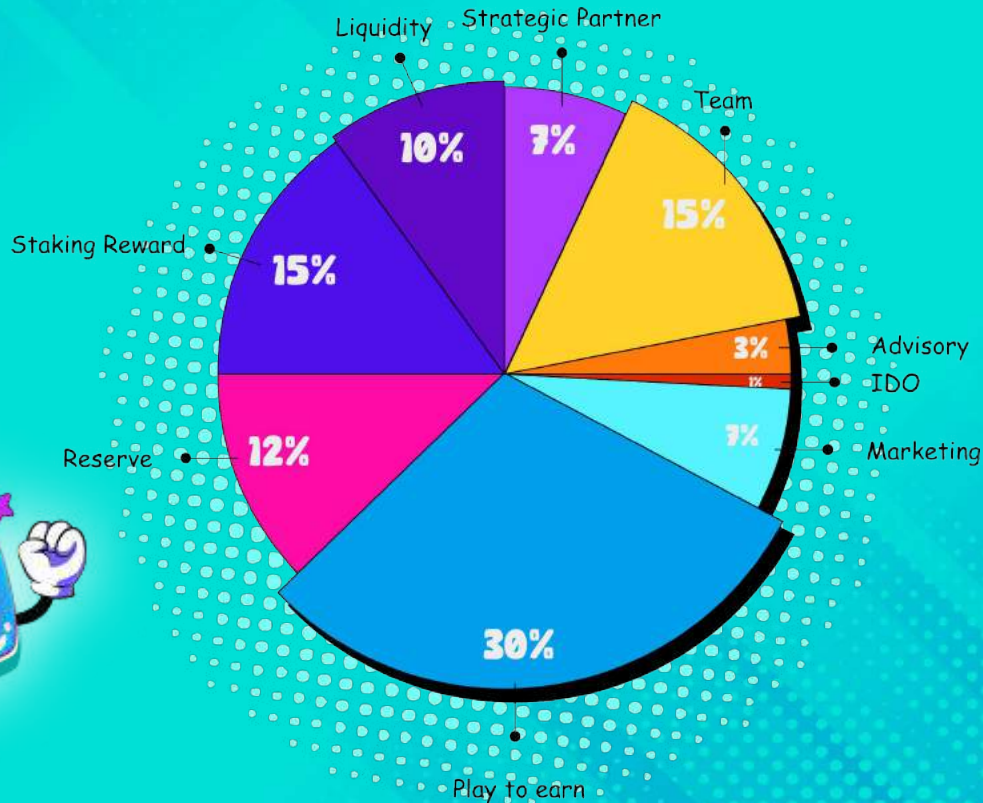

TOKEN DISTRIBUTION

Allocation	Percent	Tokens	Full lock (Months)	Vesting Period (Months)	TGE Unlock Rate	Remaining Monthly Unlock Rate
Strategic Partner	7%	70,000,000	6	12	0.00%	8.33%
